Alex Stankov

Unreal Engine Gameplay Developer | Solo Developer | Steam
Published | Machine Learning Graduate
Moscow City, Russia

Summary

Unreal Engine Gameplay Developer with 3+ years of experience building gameplay systems and releasing a complete first-person shooter on Steam. I specialize in Blueprint architecture, gameplay programming, AI, UI and simulation systems. I recently completed a Bachelor's degree in Machine Learning, where I worked on computer vision and object detection using YOLO. I enjoy solving challenging technical problems and building scalable gameplay systems in Unreal Engine.

Experience

Self Employed

Unreal Engine developer
January 2022 - Present (4 years 7 months)
Russia

Projects:

- Hazardous Island is an open-world first-person shooter focused on exploration, combat, and survival. Players can explore the island, use different vehicles, and engage in battles across diverse environments. Released on Steam

(link: https://store.steampowered.com/app/3023380/Hazardous_island/)

- Experimental fully interactive 2D game sketch entirely inside Unreal Engine Widget Blueprint (UMG). The project was created as an alternative technical solution after encountering engine limitations with sprite rendering, demonstrating creative problem-solving and unconventional use of Unreal Engine systems.

Education

MIREA (Russian Technological University)
Bachelor's Degree, Machine learning · (September 2022 - July 2026)
